

Universal Printer Base

Highlights

- Printer recessed in base to eliminate possible spillage to cutter and /or print head.
- Ships fully assembled with terminal, printer, and rear display for one simple plug in connection.
- Powered by a single internal power source that powers the terminal, printer and rear display.
- Modular design makes all components easily and quickly replaceable.
- Out of the box printer, no print mechanism required

Touch Dynamic redefines the all-in-one design by integrating a thermal receipt printer into our popular all-in-one terminals. The compact design of the universal printer base allows for easy setup, and will save precious counter space and reduce cable clutter. The thermal printer is recessed into the base of the all-in-ones to eliminate possible “spillage” damage and is easily & quickly replaceable. The printer is also powered by the terminal power supply eliminating the need for a separate printer power supply.

Universal Printer Base
